Add a touch of *luxury* to your home with Artesian Spa's Staycation Series. Our compact, user friendly spas will whisk you away into a holiday state like no other.

Staycation Spas will help you relax and unwind with all the mental and physical health benefits you will feel from soaking in one of our hot tubs.

The Staycation Series spas are committed to quality as they are to efficiency whilst incorporating a modern design, stainless steel jets and a customisable massage in every seat. You can also add additional mood soothing lights and energy efficient features for a custom made relaxation retreat in your own back garden.

Sequoia

## All Seasons Shield Cover Colours

Midnight

Stone

Pinot

Sea Oats

## Standard Features

### Aesthetics

- Stainless Steel Escutcheons - Corrosion-resistant fixture covers add an elegant, glimmering accent.
- Blue LED - This cool, blue light creates a calming and tranquil spa environment.

### Green Technology

- ArcticPac Insulation - Foamed shell and plumbing combined with a reflective barrier provides excellent insulation in any climate.
- Maintenance-Free Cabinet - Synthetic cabinets weigh less than wood, yet are more resilient and durable. Unlike wood, these cabinets will not chip, warp or rot.

### Protecting Your Spa

- ABS Base - ABS is a sealing for the bottom of your spa. Unlike traditional spas that only use plywood, an ABS base will not rot and protects your spa from the elements and rodents.
- Spa Cover - The ASTM Deluxe safety cover helps insulate and protect your spa.

### Optional Features

- Full Foam Insulation - Full foam provides the most efficient heat retention available in any spa. The Icynene brand of full foam secures plumbing to the shell for longer plumbing life and provides a seamless air barrier, for even better insulation and running costs.
- Spa Frog In-Line System - This breakthrough water-care system provides cleaner, clearer and softer spa water that's easier to maintain. The Spa Frog system automatically dispenses bromine and water conditioner to your spa water. Simply replace the bromine and water conditioning cartridges when required. An in-line feeder or dispenser is required to ensure the hot tub is HSG282 compliant.
- Ozone with Mazzai Injector - Ozone provides additional water treatment that purifies water faster than chlorine. With ozone, your spa water will require fewer chemicals to be added.
- AOP Water Purifier - Advanced Oxidation Process (AOP) combines UV Sterilisation with Ozone to create a powerful purification system.
- Multi-Colour Lighting - The addition of one of our lighting packages will provide a wonderful multi-coloured night time ambience.
